Education

Certified Tech Developer: Computer Programming, Expected in 04/2025

Digital House - Buenos Aires, Argentina

IT Security Analyst: Computer Programming, 07/2024

Coder House - Buenos Aires, Argentina

Java Developer: Computer Programming, Expected in 03/2025

Coder House - Buenos Aires, Argentina

Professional Summary

Driven problem-solver with passion for designing innovative software solutions. Possesses solid understanding of programming languages and development frameworks, coupled with expertise in JavaScript and Python. Committed to delivering impactful software products that enhance user experiences and drive business success.

Skills

- Problem-solving
- .NET development
- Code debugging
- RESTful apis
- Java specialist
- JUnit testing
- Database connectivity
- Object-oriented programming
- Web security
- API integration
- Back-end frameworks
- Git version control
- Spring framework

Work History

Software Developer, 05/2024 to Current

ARGENSOFT – Remote

- Improved software efficiency by troubleshooting and resolving coding issues.
- Saved time and resources by identifying and fixing bugs before product deployment.
- Collaborated with cross-functional teams to deliver high-quality products on tight deadlines.
- Enhanced user experience through designing and implementing user-friendly interfaces.
- Updated old code bases to modern development standards, improving functionality.
- Built databases and table structures for web applications.
- Participated in software field testing to verify performance of developed projects.
- Collaborated with cross-functional teams to ensure seamless integration of new features and bug fixes.
- Streamlined QA processes for better efficiency, implementing standardized test cases across multiple projects.

Projects

Software Developer, 2025-02 to 2025-04

DIGITAL HOUSE – Remote

- Ensured seamless integration of Java-based applications with databases, APIs, and other systems.
- Developed user-friendly interfaces for web applications, improving user experience and satisfaction.
- Managed efficient SQL queries and data transport.
- Implemented robust security and data protection measures.
- Worked closely with UX/UI designers to translate their designs into functional web applications.
- Built databases and table structures for web applications.
- Utilized version control systems such as Git to track changes throughout the development process.
- Streamlined QA processes for better efficiency, implementing standardized test cases across multiple projects.

Certifications

- Certified Tech Developer
- Cybersecurity Analyst
- Java Analyst
- Bases de Datos en MySQL
